

HOW USE V-CHANGER

V-CHANGER is an module by Darkside and Zer01ne,
With this you can change the name of your firmware ,

For change the name you must,
Open the VERSION,BDT file in ms0:/ .
The contents of the file should be :

release:1.50 BDT:
build:376,0,3,1,0:root@psp-vsh
system:20182@release_150,0x01050001:
vsh:[p4201@release_150](#),v11079@release_150,20050201:

To change the version you must change BDT to your name desired
.
Then save this and go to the updater and run change name of
Firmware.
