

yPaint Anniversary Edition by Yongobongo

Release Info

Copyright: Yongobongo (<http://www.yongobongo.info/>)

Release: 6.1.9

Version: Anniversary Edition – **Celebrating 1 Year of yPaint Goodness on your PSP**

Thanks to: [NeoFlash](#)

Installation

For non-custom firmwares:

Copy the 'PSP' folder to the root (top) of your memory stick.

Run from XMB.

For custom firmwares:

Rename the 'GAME' folder inside 'PSP' to 'GAME150' and copy the 'PSP' folder to the root (top) of your PSP.

Run from XMB.

Up on RGB – Take 1 from red value

Right on RGB – Take 1 from blue value

Left on RGB – Take 1 from green value

Cross on Colour Select Panel/Palette – Select Colour

Cross on Menus – Select Item

Configuration File

In 'settings.cfg' you can modify any variable in yPaint (string, function etc.)

For example, to change cursor sensitivity/speed, type this in settings.cfg:

```
cursor.sensitivity = 24 -- Integer, 24 is default.
```

To add things to the main loop, you MUST edit the function, userFunctions():

```
function userFunctions()  
  
screen:print(0,0,"User added function, used in main loop of program.")  
  
end
```

To change the directory yPaint loads/saves images from:

```
dir = "ms0:/PSP/PHOTO" -- String, "ms0:/PSP/PHOTO" is default.
```

Basically, this file is for changing settings and adding 'mods' to yPaint. You may distribute a modified settings.cfg for yPaint, bundled if you wish, with the correct licensing and credits to the developer.

Easter Egg

yPaint Anniversary Edition has a special 'easter-egg' (well, really not that special) that can be enabled easily (but it might not seem so until you find out what it is, hehe ☺).

I am offering a QJ point prize for the first person to PM me what they see on the screen when they have enabled the easter egg ☺

CLUE: settings.cfg ☺

Notes

- yPaint Anniversary Edition runs at 333mhz
- The 'zoom' feature is made mainly for pixel art, other tools will work with the zoom but the preview is inaccurate, as it is not resized.
- I release this under a Creative Commons license, meaning you may modify this work with correct credit and it may only be distributed free of charge.
