

# XMB Eboots Launcher by Red Squirrel

<http://redsquirrel.forumitalian.com>

<http://redsquirrel.pspgen.com>

## SUMMARY

1. What's it?
2. Features
3. How to use
4. Icons Explanation

## What's it?

With this plugin you can launch an eboot when you press on one of the XMB icons.

### Notes:

- If your Eboot.pbp is in fw 1.50 mode (with kxploit!) you have to insert in the config file the path o the Eboot.pbp contained in % folder (folder with % character in its name!).
- Location Free Player icon can be replaced ONLY in PSP that did not install the 1.50 addon!  
If you have the 1.50 addon installed and you want to use the Location Free Player icon you have to insert only the original lftv\_plugin.prx in flash0:/vsh/module.
- Skype icon can be replaced ONLY in PSP Slim & Lite.
- VSHMenù function can be replaced ONLY if you have the M33 VSHMenù enabled in Recovery Menù.

## Features

v1.2

Added a README.PDF.

Added the following icons to the list of the icons that can be replaced:

- Skype (Slim only)
- VSHMenù (SELECT button)
- Opening (just after the coldboot)
- NETSettings (Network Settings and, unfortunately, USB Connection)

v1.1

Added the following icons to the list of the icons that can be replaced:

- Music (the MS icon under the Music menù)
- Video (the MS icon under the Video menù)
- Photo (the MS icon under the Photo menù)
- Internet Browser
- Saved Data Utility
- Internet Radio

v.1.0

In the first version icons that can be replaced are:

- Network Update
- Location Free Player
- Remote Play
- RSS Channel
- Game Sharing
- Camera

## How to use

Copy the SEPLUGINS folder in the ROOT of Memory Stick and activate the plugin from Recovery Menü. Then edit the XMBEL.txt (in SEPLUGINS folder) with your own preferences.

**Note:** to apply changes to the TXT you have to reboot the console!

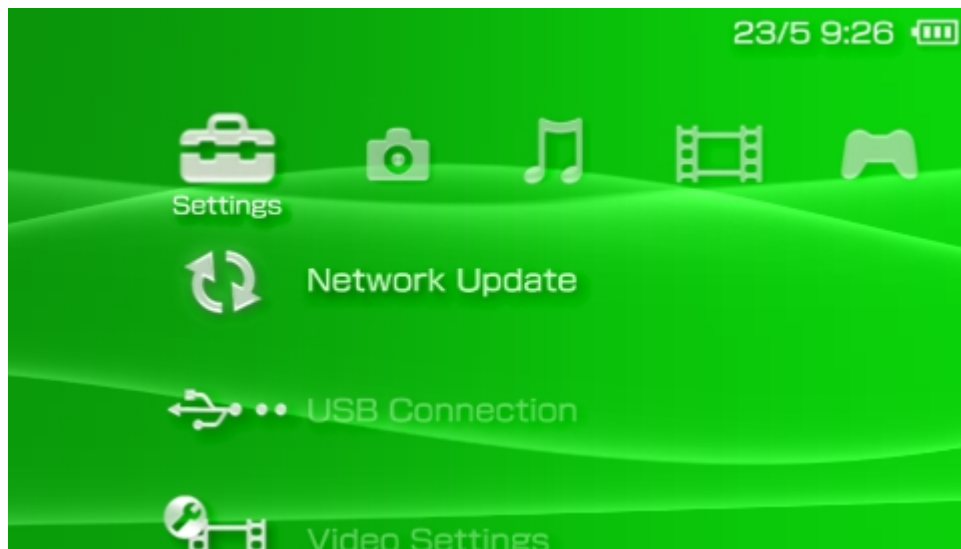

## Icons Explanation

In XMBEL.txt you will find the following lines:

```
#NetworkUpdate = "ms0:/PSP/GAME/HOMEBREW/EBOOT.PBP";  
#LocationFreePlayer = "ms0:/PSP/GAME/HOMEBREW/EBOOT.PBP";  
#RemotePlay = "ms0:/PSP/GAME/HOMEBREW/EBOOT.PBP";  
#RSSChannel = "ms0:/PSP/GAME/HOMEBREW/EBOOT.PBP";  
#GameSharing = "ms0:/PSP/GAME/HOMEBREW/EBOOT.PBP";  
#Music = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#Radio = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#Video = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#Browser = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#Photo = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#Savedata = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#Camera = "ms0:/PSP/GAME/HOMEBREW/EBOOT.PBP";  
#Opening = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#NETSettings = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#VSHMenu = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";  
#Skype = "ms0:/PSP/GAME/RSPSARDUMPER/EBOOT.PBP";
```

This is the correspondence of each line with the XMB icons:

#NetworkUpdate:

<http://redsquirrel.pspgen.com>

#NETSettings:

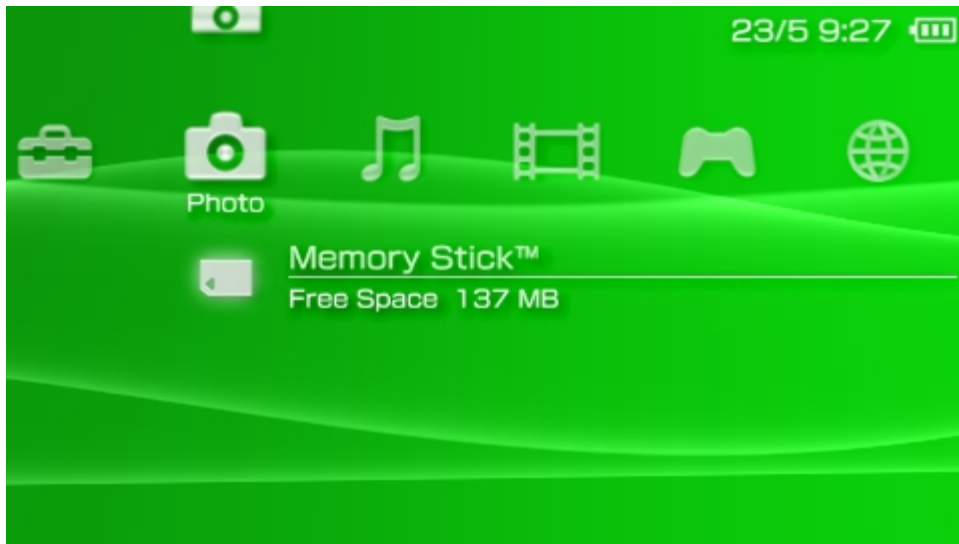

**Note:** for some unknown reason, if you enable this option your Eboot.pbp will be launched when you press the USB Connection button too! I hope to fix this bug soon...

#Camera:

#RSSChannel:

#Skype:

#VSHMenù: if you enable this option your Eboot.pbp will be launched when you press SELECT button.

**Note:** to use this function, you have to enable M33 VSHMenù from Recovery Menù!!!

#Opening: if you enable this option your Eboot.pbp will be launched just after the coldboot. If you don't want to view the SCEE intro before to start the Eboot.pbp, you can disable SCEE intro from Recovery Menù.
